https://leetcode.com/u/kavya_nagpal00/

Backend Developer with a strong foundation in Python, Django, and REST API development, experienced in building scalable server-side applications. Proficient in designing and managing relational databases using PostgreSQL and SQL, with a focus on efficient data handling. Skilled in implementing authentication, business logic, and clean API architecture to develop secure and maintainable systems.

EDUCATION

Maharishi Markandeshwar(Deemed To Be University)

B. Tech in Computer Science and Engineering

Haryana, Ambala

Aug 2023 – July 2027

PROJECTS

Product Inventory Management System | Python, Django, DRF, PostgreSQL

July 2025 – Sept 2025

- Developed a backend system for managing product inventory, enabling real-time stock tracking and efficient updates
- Designed and implemented RESTful APIs for product management, including add, update, delete, and retrieval operations
- Implemented business logic to prevent overselling, ensuring stock validation before processing sales
- Built a sales tracking module to record transactions and maintain accurate inventory levels
- Generated daily sales reports to monitor product performance and revenue trends
- Tested APIs using Postman and ensured proper validation, error handling, and response structure

Smart Job Portal API | Django, DRF, JWT, PostgreSQL

Feb 2026 - April 2026

- Developed a scalable backend architecture for job posting and application management using Django and Django REST Framework, ensuring modular and maintainable code structure
- Implemented role-based authentication system (User & Recruiter) using JWT, with secure login/signup APIs and protected endpoints
- Designed and developed RESTful APIs for job creation, application tracking, and user profile management with proper validation and error handling
- Built an AI-based matching algorithm to compare user skills with job requirements and generate a match score, improving job recommendation accuracy
- Implemented filtering, search, and pagination for job listings to enhance user experience and handle large datasets efficiently
- Tested and validated APIs using Postman, ensuring reliable API responses and proper error handling

Certifications

- Python for Everybody – Coursera
- SQL (Basic) – Hacker Rank
- Django for Beginners – Udemy
- Data Analysis with Python – IBM (Coursera)

TECHNICAL SKILLS

Languages: Python, Java

Backend: Django, Django REST Framework (DRF), REST APIs

Database: PostgreSQL, MySQL

Tools: Git, GitHub, Postman, VS Code

Libraries: Pandas, NumPy, Matplotlib

Core Skills: Data Structures & Algorithms, DBMS, Operating Systems, OOP

Authentication: JWT, Role-Based Access Control
